

**WINDOWS**

# OPENING UP WINDOWS OF OPPORTUNITY

Your current doors or windows may not suit you for many reasons. Difficult to reach handles, tricky or insecure locking mechanisms and poorly maximised natural light are all common problem areas.

With a variety of colours and finishes to choose from, as well as multiple frame shapes and hardware options, our Independent Network member will help you to find the ones to best suit your home and style.

# INTRIGUED? DON'T JUST TAKE OUR WORD FOR IT...

Our members apply the same high standard of workmanship across every project, no matter how big or small...

“Great products, friendly workmen, no hassle service, delivery and installed on time – highly recommended.”

Mrs Boxall

“Excellent service from enquiry to fitting. No pressure sales. Good advice, friendly, professional and efficient at every stage. Very pleased would highly recommend.”

Mrs Butterworth

“Would recommend these guys to anybody, the service they offer is faultless. Everything ran smoothly and to timing and they really do offer quality products. I'll certainly be using again in the near future.” Mr Martin

# Are you living in a Green House?

If not, we can help!

Old windows, doors and conservatories are responsible for a significant proportion of wasted energy in homes across the UK

...but we have the answer!

## It's easy to be green...

People today are far more aware of the methods and means of reducing their impact on the environment when compared to just a few years ago. This in tandem with ever increasing energy prices has led homeowners to make improvements to their properties which benefit the environment. Loft and cavity wall insulation, solar panels and energy efficient windows and doors are the main areas of 'green' investment.

When you look at the infra-red images below, it is easy to see why more and more people are choosing to replace timber and even 1st generation PVC-U windows with the more energy efficient frames that are available today. It's such a simple way to save money and do your bit for the planet too.

*The warmest areas seen here in red show where heat is being lost from the building.*

*Red areas have been eliminated after fitting energy efficient VEKA windows.*

## Our products give you...

### Smaller energy bills

Replacing all single-glazed windows with A-rated double glazing could save you £££'s each year on your energy bills

### A smaller carbon footprint

By using less fuel, you'll generate less of the carbon dioxide that leads to global warming - typically, 680kg a year.

### A more comfortable home

Energy-efficient glazing reduces heat loss through windows and means fewer draughts and cold spots.

### Peace and quiet

As well as keeping the heat in, new energy efficient windows insulate your home against outside noise.

### Reduced condensation

Energy-efficient glazing reduces condensation build-up on the inside of windows.

## PLUS they're low, low maintenance

Life is too short to be sanding and painting rotten old timber window frames - and even the old discoloured PVC frames need more care and attention than they used to. With our next generation PVC-U frames, all you need is a quick wipe with a warm soapy cloth. No fuss, no mess. Done!

## Nothing but the best energy rated frames...

We have dedicated significant time and money in developing a range of energy efficient products, all of which are capable of achieving the highest Window Energy Rating (WER) values. The WER system allows consumers to make fair comparisons (based on energy efficiency) between different windows, much the same as with white goods such as washing machines and dishwashers.

# CASEMENT WINDOWS

The most popular and versatile style of window that we offer. Suited for both traditional and contemporary homes, they bring endless possibilities of choices and options.

With a choice of fixed or opening frames, colours, finishes and hardware, your windows can be as unique as your home is.

Discuss with your Independent Network member which design of casement window

would suit your home and needs best – the combinations are endless.

Leaded or chamfered glass are often fitted to top openers to enhance the look of these windows.

As with all VEKA uPVC windows, casement window maintenance is minimal. An occasional wipe with soapy water and a drop of oil on the hinges will keep your windows looking good and functioning well.

- Simple, versatile and user-friendly design
- Available as fully sculptured or chamfered
- Option of top or side openings
- Enhances warmth and security
- Long life and low maintenance
- High security locking systems
- Energy efficient
- Wide range of colours and glazing options
- Independent Network comprehensive ten year insurance-backed guarantee
- Manufactured using VEKA Group profile
- Low maintenance
- Visit [www.inveka.co.uk](http://www.inveka.co.uk) for further information and product video

# VERTICAL SLIDER WINDOW

Indulge in the timeless appeal of traditional timber sash windows, yet benefit from the innovations found in modern windows. VEKA Group's Vertical Slider Windows deliver the best of both worlds, including a dual opening function that adds easy cleaning and further ventilation to the list of benefits.

From the outside, it's difficult to determine this modern alternative from the original timber windows, yet the maintenance usually associated with such beautiful features is virtually non-existent with Vertical Slider Windows. With the ability to tilt as well as slide, these windows also offer years of life with little intervention. uPVC construction results in a window that doesn't rot, swell or warp, while never needing repainting.

Energy efficiency is an ongoing battle with many older properties, with potentially ill-fitting single-glazed windows being a major source of heat loss.

Replacing your traditional timber sash windows with Vertical Slider Windows virtually eliminates this issue, reducing the money you spend on heating your period home.

They can also reduce the level of exterior noise and draughts that penetrate your home, leaving you to enjoy a peaceful warm haven. Many period properties are subject to stricter planning regulations, particularly if situated in conservation areas.

The style of VEKA Group's Vertical Slider Windows mirrors that of the originals, complete with the optional 'horns' featured on many of their timber counterparts.

- Traditional timber window look
- Slide or tilt function for easy cleaning and ventilation
- Improved heat retention
- High security locking systems
- Low maintenance
- Energy efficient
- Manufactured using VEKA Group profile
- Optional sash horns and a wide range of colours and glazing options
- Independent Network comprehensive ten year insurance-backed guarantee
- Visit [www.inveka.co.uk](http://www.inveka.co.uk) for further information and product video

A range of style and colour options enable you to configure your new windows to replicate your originals, while sympathetically blending with your internal style or colour scheme.

All Independent Network installations are installed by experienced fitters and reinforced with a ten year insurance-backed guarantee.

# TILT & TURN WINDOWS

Tilt & Turn Windows deliver the functionality and clean lines you'd like from new windows, with the security and energy efficiency you'd expect. VEKA Group's team applied years of experience to develop a window design that opens in two different ways while also making cleaning as simple as its operation.

One turn of the handle allows you to tilt the window inwards, then a second turn enables it to open fully inwards for maximum fresh air, an uninterrupted connection to the outside world and ease of cleaning.

When tilted, the windows allow ventilation while minimising the effect of the elements, as well as protecting you from unwanted guests.

Simplicity is core to the exterior view of these windows, with no moving or outward opening parts to break the clean lines of your home.

Available in either sculptured or chamfered design with a number of glazing options, as well as a choice of woodgrain and colour options, there's a Tilt & Turn Window to suit every home.

We make sure the money you spend on energy isn't wasted by expertly installing weather tight windows and doors. As with all Independent Network installations, all Tilt & Turn Windows are accompanied by a ten year insurance-backed guarantee.

- Open inwards in two ways
- Opens fully inwards for easy cleaning
- Available as fully sculptured or chamfered
- Minimises outdoor noise
- High security locking systems
- Low maintenance
- Energy efficient
- Manufactured using VEKA Group profile
- Wide range of colours and glazing options
- Independent Network comprehensive ten year, insurance-backed guarantee
- Visit [www.inveka.co.uk](http://www.inveka.co.uk) for further information and product video

# FULLY REVERSIBLE WINDOWS

Cleaning windows in multi-storey buildings has never been so easy with VEKA Group's Fully Reversible Windows. Offering no compromise on looks or performance, these revolutionary windows offer unhindered access to both sides of the glazing, and are particularly popular for installation on hard-to-reach upper floors.

The benefits of Fully Reversible Windows are obvious where window cleaning isn't as simple or accessible as in a ground or first floor home. All moving parts of the windows remain outside, making it less likely that window cleaning liquids will drip into your home.

Easy cleaning isn't the only benefit though – infinite levels of ventilation are available thanks to a fully rotating glazing panel, while window blinds can be fitted in the reveal and are therefore not affected by the windows being opened or cleaned.

When closed, the windows deliver exceptional weather resistance and energy efficiency. Offering the same insulation ratings as other products from VEKA Group's double and triple glazed window range, these Fully Reversible Windows are more than just an easy cleaning solution.

Exterior sounds that penetrate your property, such as from busy roads or other transport modes, can be significantly reduced, while warmth remains inside your home, potentially leading to lower energy bills.

Given a wide range of colour and finish options, inside and out if required, you can complement both your exterior and interior design schemes. This is particularly useful where you may have to conform to design regulations in a multiple occupancy building.

As with all installations from Independent Network, all Fully Reversible Windows come with a ten year insurance-backed guarantee so you can rest assured you're covered against any future problems.

- Entire window can be turned back on itself for easy cleaning, while protecting your blinds and curtains
- Ideal for externally inaccessible windows, with built in two stage restriction
- Long life and low maintenance
- Strong and secure
- High security locking systems
- Energy efficient
- Wide range of colours and glazing options
- Independent Network comprehensive ten year insurance-backed guarantee
- Manufactured using VEKA Group profile
- Visit [www.inveka.co.uk](http://www.inveka.co.uk) for further information and product video

# HARDWARE, LOCKS & HANDLES

From the overall finish to the individual touches that make them a pleasure to look at and use, we want you to be happy with your new windows and doors.

Your chosen member has a high quality selection of hardware that has all passed the toughest industry tests with flying colours, proving its durability in the same way we expect our windows and doors to do.

Handles, chains, hinges, numbers and letterplates are available in chrome, gold, white, black and many more colours to complement the wide choice of finishes on our windows and doors.

Make your new window and door truly yours with some individual finishing touches.

Ask your Independent Network member about the range of colour choices available in hardware.

# COLOURS

Whatever colour you choose, you can rest assured that your new frames come with all the quality, energy-efficiency, guarantees and low maintenance benefits you would expect from your local Independent Network member.

You can even choose one colour for the inside and one for the outside; they're tailor-made for you to match your home. Whichever combination your frames will stand the test of time thanks to the ten year insurance-backed guarantee.

If you have a colour in mind that you can't see here please ask your Independent Network installer - VEKA offer a wide range of bespoke colours that are tailored to meet each customer's needs.\*
